DIRECTIONS FOR USE

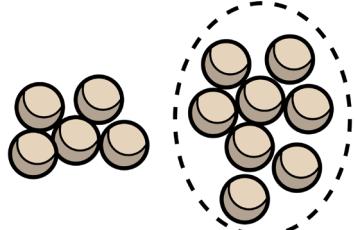

....

This AAC placemat is intended for use as a placemat for a person who uses alternative and augmentative communication (AAC), as a way to communicate when they are eating, and may not have quick access to their communication device.

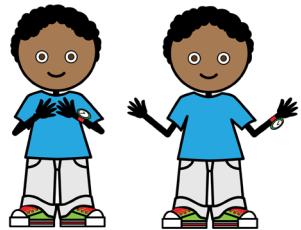

You can use the placemat during mealtimes by printing in A3 and laminating it, so it can be wiped clean after use. It is intended that the bowl/ plate is inserted in the labelled circle, so that the person can see all of the symbols while they eat.

The placemat is not intended to use instead of the person's recommended AAC system, it is only for quick access when the usual method is not available.
